DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 27-28, 30-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan, Jr. (U. S. Pat. 5,743,025).

Jordan shows a main body portion including a top 14, a bottom 16, opposing sides 20, 22 and rear wall 18 portions defining an interior chamber. The main portion 20 includes a latticework frame with openings. A door member 24 connects to the main body portion. The door member is formed from a latticework frame with openings. The pivotal door member being adapted to selectively retains a volatilizable material within the interior of the main body. A drying airflow is adapted to pass through the interior chamber when the media holder assembly is positioned in an air passage of a laundry dryer. With regard to claim 30, any openings may serve as a handle element. For claims 31, 33, see elements 28 as guide element. For claim 34, see door latch 26.

Allowable Subject Matter

3. Claims 1-26 are allowed.

Art Unit: 3749

4. Claims 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Piegza et al. (U. S. Pat. 3,744,402), Daily (U. S. Pat. 4,091,548, 4,109,397), Rhode et al. (U. S. Pat. 6,374,644) all show a clothes dryer with a holder.
